Yudal Recreation Area night view

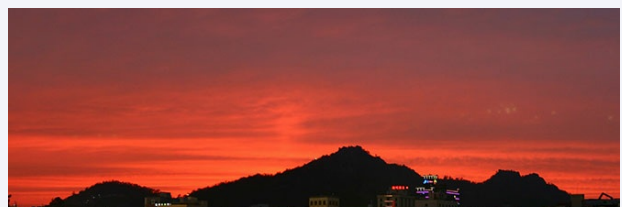

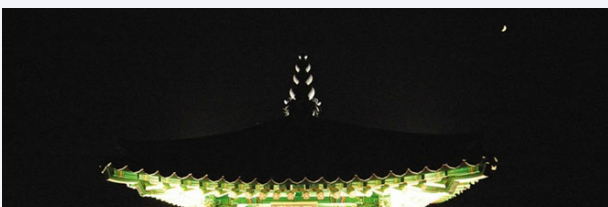

If you head toward the west from the crowded dock of Mokpo city while enjoying the scent of the sea, then you can see open seas soon enough.

You have entered Daebandong and you can see Yudalsan Mountain.

Following the seaside there are raw fish restaurants and other restaurants, lodging, and beach and other entertainment facilities.

Cafes open a big window toward the beach so you can enjoy watching the beach by the window. This is a famous dating spot for lovers: You can have a cup of tea while watching the evening sun of the blue sea dotted with islands at a wide-windowed cafe after you've tired yourself from walking on the sand of the beach. During summer, while enjoying the cool ocean breeze and a guitar song you can cool yourself during a hot summer day.
